# Connection. Protection.

A focused update for banks and fintechs, retaining the merchant and customer experience.

## One shared audience

Address **banks and fintechs** together. The opening now reads **Go beyond payment confirmation.** Remove wording that positions fintechs as opponents. Keep the merchant problems and the budget-friendly device message.

## Original device. Refined motion.

Restore the owner's original silver device in all three product sections and the original merchant-problems hero image. Keep readable HTML benefits. Add brief light sweeps, curved connection signals and tap feedback. Respect reduced-motion preferences.

## Keep the six features

Live OPEN/CLOSED status, offers and discounts, live confidence, security alerts, 24/7 fire and smoke safety, and merchant app control. Cards sit around the device on desktop and stack on phones. Do not shrink image text to fit a small screen.

## Keep every audience visible

The Challenge keeps 8 partner issues in two rows above merchant and customer panels, each with 3 merged issues. One Device keeps all 17 benefits: 7 partner, 6 merchant and 4 customer benefits. Desktop uses a side-by-side overview; mobile scrolls naturally with every benefit expanded.

## Preserve the brand

Green **#004A00**, navy **#010C28**, bright green **#00E28A**, white and pale panels. Keep the circular H logo blue **#165AAC**. Use **Connection. Protection.** in the header and footer. Keep the existing local Inter and Space Grotesk fonts.

## Keep roles clear

CASA remains explicitly a bank benefit. Credit text distinguishes direct bank lending from fintech lending-partner connections. Retain lender eligibility and supported-hardware qualifications. No new claims of guaranteed growth or protection are added.

Merchant and customer problems, benefits, the phone workflow and audience figures remain. The updated partner wording also appears in the vision, partnership, nine FAQs, contact prompts and page metadata.

# Ready for your designer.

Editable source, a production build and practical integration notes are included in the ZIP.

## Run the included website

Extract the ZIP, open a terminal in **hereopen-website**, and run the following command with Node.js 22 or newer:

```
node scripts/serve.mjs
```

Open **http://127.0.0.1:4317**. Keep the terminal open. This serves the included **out/** build and needs no package installation.

## Edit and rebuild

Run **pnpm install --frozen-lockfile**, then **pnpm run dev** for the development preview at port 3000. After edits, run **pnpm run build** to update the production build. The README includes npm alternatives.

## Where to make changes

**src/content/site.js**: challenges, benefits, workflow and FAQs.
**src/components/PartnerGraphics.jsx**: original device and relationship graphics.
**src/app/product-motion.css**: artwork frames and motion.
**OriginalHero.jsx, OurSolution.jsx, Vision.jsx**: section copy.
**src/app/page.jsx**: menu, page order, partnership and contact.

## Preserve interactions

Home returns to the first page. Contact opens the form section. The OPEN/CLOSED phone demo updates its status, steps and animated pointer. Keep reduced-motion support and the zoomable hero illustration. FAQ uses nine expandable questions. Keep light and dark themes readable.

## Contact form and deployment

**Submit** opens an email draft; the visitor reviews and sends it. It does not send automatically. Connect the existing form endpoint if needed. To deploy the static website, upload the contents of **out/** to the domain root and preserve existing legal routes.

## Review boundary

This update has **not been published**. Live-site inspection was blocked during this run, so the update uses the existing local source. Compare any newer production-only changes before deployment. The original device and hero artwork are displayed unchanged. Browser visual checks were blocked by unavailable inspection tools; review both desktop and mobile before publication.

See **README.md**, **DESIGNER-HANDOFF.md** and **ASSET-SOURCES.md** for the full handoff.
